

# CPE Monitor & You

Have you setup your NABP e-Profile for the CPE Monitor™ service to ensure your ACPE-accredited CPE units are properly tracked for licensure? Visit [MyCPEmonitor.net](http://MyCPEmonitor.net) and create a profile.

## What is CPE Monitor?

A national collaborative effort between the National Association of Boards of Pharmacy® (NABP®), the Accreditation Council for Pharmacy Education (ACPE), and accredited CPE providers, the CPE Monitor service will allow you to easily track your ACPE-accredited continuing pharmacy education (CPE) units electronically.

Many ACPE-accredited CPE providers are now requiring pharmacists and technicians to submit their NABP e-Profile ID, plus their birth date (mmdd), to receive credit for completed CPE. Participation data will be sent electronically from the provider to ACPE, then to NABP for recording into the matching e-Profile. See CPE Monitor FAQs on the reverse side of this flyer for additional information.

## What are the benefits of CPE Monitor?

- Streamlines the reporting and compliance verification process.
- In 2013, the service will make available the CPE data to boards of pharmacy who request information on licensee CPE as part of their compliance activities.
- Eliminates paper forms and the need to submit paper copies of CPE statements of credit for ACPE-accredited activities in most jurisdictions.
- NABP e-Profile will store a comprehensive list of your CPE activities completed and will allow you to verify compliance with CPE requirements. To accomplish this, each e-Profile must contain complete and accurate information. Any errors in the e-Profile may result in unrecorded or mis-recorded CPE, with possible adverse consequences for licensees when renewing their licenses. Using the SSN as the unique national identifier for each individual will help NABP to ensure the required level of accuracy for your e-Profile.
- All information is maintained in a highly secure environment.

Please note: Initially, CPE Monitor will not track CPE from non-ACPE-accredited providers. Until this feature is added in Phase 2, non-ACPE-accredited CPE will need to be submitted directly to the board of pharmacy.
