

TIPS FOR THE SAFE USE, STORAGE AND DISPOSAL OF PRESCRIPTION OPIOIDS

Opioid medications have a serious risk of dependence, addiction or overdose.

Talk to your doctor or pharmacist about the potential risks and side effects, and ask if there are alternative treatments available.

Store your medication in a secure place to avoid misuse by children, visitors or others.

Dispose of unused prescription opioids as soon as possible.

If you or someone close to you is misusing drugs, help is available.

ALTERNATE OPTION:

Since the standard prescription bag size is 5" x 10" x 2", this size (3"x7") allows for larger copy, will fit the bag without folding and is large enough to not get lost if it's in a larger prescription bag.

Will fit 3 up on an 8.5x11.
