Executive Director Jay Campbell proceeded with the case and stated that Mr. London was reported to the Board by NC Pharmacist Recovery Network (PRN) after becoming non-compliant with his PRN contract by diverting gabapentin while performing administrative duties at his pharmacy. Vaccine Administration/CPR Issues

The Board staff received an inquiry concerning the 21 N.C.A.C. 46.2507(d)(1), which is a part of the rule governing pharmacist administration of influenza, pneumococcal, and zoster vaccines. The rule states that a pharmacist who administers vaccines “shall . . . hold a current provider level [CPR] certification issued by the American Heart Association or the American Red Cross or equivalent.” Staff received an inquiry concerning a pharmacist who is certified to administer vaccines but because of a physical disability is unable to perform CPR and whether it would satisfy conditions of the rule to have a pharmacy staff member trained and available to perform CPR when the pharmacist is administering vaccinations. Mr. Campbell stated that he contacted the Medical Board, as requested by the members, for their input on the rule. The Medical Board is willing to look at a possible rule amendment to allow pharmacist who are unable to perform CPR due to disability to vaccinate.
